DETAILED ACTION

This Office action is in response to the communication filed 10-6-08.

Claims 1-5 and 11 are pending in the instant application.

Response to Arguments and Amendments

Withdrawn Rejections

Any rejections not repeated in this Office action are hereby withdrawn.

Applicant's arguments with respect to claims 1-5 and 11 have been considered but are moot in view of the new ground(s) of rejection set forth below.

New Rejections

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Thompson (USPN 5,902,880).

Thompson (USPN 5,902,880) teaches recombinant DNA constructs including cloning expression vectors comprising at least one transcriptional unit comprising an engineered or native Type I Pol III transcriptional promoter, or one or more essential

elements thereof, and further comprising a template for making an RNA molecule, and a transcriptional terminator (see esp. col. 1-3, 7-10, claims 1, 2, 11, 19 and 21).

Claims 1-5 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Jennings et al (EMBO J., Vol. 6, No. 10, pages 3043-3047, 1987).

et al (EMBO J., Vol. 6, No. 10, pages 3043-3047, 1987) teach recombinant DNA constructs including cloning expression vectors comprising at least one transcriptional unit comprising an engineered or native Type I Pol III transcriptional promoter, or one or more essential elements thereof, and further comprising a template for making an RNA molecule, and a transcriptional terminator (see the abstract and introduction, page 3043, discussion on pages 3045-6).
